- **Filemaker Data API** - Proficient
- **Docker** - Proficient

Tools

- **VSCode**
- **Github**
- **Figma**
- **Windows Proficient**
- **Linux Proficient**

Education

B.S.

COMPUTER SCIENCE

Thomas Nelson Community College/Old Dominion University

Relevant Experience

2017 – PRESENT

WEB SPECIALIST/SHIFT LEAD

CHICK-FIL-A | Hampton, VA

Technical Responsibility
- Developed the website with Nodejs from the ground up with Realtime Create and Read functionality with the Database.
- Helped create scripts for the database software to add functionality needed for our specific use case.
- Leveraged Elastic Beanstalk paired with Docker to host the web app with horizontal scalability kept in mind.
- Leveraged AWS CodePipeline to implement a CI/CD flow.
- Utilized Jamf to manage store-owned devices.

Leadership Responsibilities/Qualities
- Self-starter, loves to streamline/automate everything possible.
- When managing, focus on incremental improvements
- Strives to create an environment of mutual respect and openness. People are bound to upset each other, lead by example to resolve conflict through a calm mind and an open heart.

Projects

- **Safe Count System -** A digital way to keep track of safe counts and who made them. (Made with Express, Pug, and MongoDB. Hosted with HerokuApp). Visit Here.
- **Job Application System -** A complex website that populates job openings depending on what job records are in a database. (Built with Express, Filemaker, React, Pug (Jade), and powered by Amazon Web Services). Visit Here
